

Postdoc in Lymphatic Endothelial Biology in Switzerland

The Laboratory of Lymphatic Bioengineering, an interdisciplinary and dynamic lab that is part of the Bioengineering Institute within the School of Life Sciences at the EPFL (École Polytechnique Fédérale de Lausanne or Swiss Federal Institute of Technology, Lausanne), is seeking applications for a postdoctoral fellow to study the role of lymphatic vessels in lipid metabolism. The ideal applicant will have a PhD in vascular biology or lipid metabolism, and experience with animals and in vivo imaging or microscopy; he/she should be highly motivated, independent, and have excellent writing skills. Interested candidates should send a CV with three references to Melody Swartz at melody.swartz@epfl.ch
