Thrombosis and Haemostasis

International Journal
for Vascular Biology and Medicine

Thrombosis and Haemostasis, a leading journal in its field for more than 55 years publishes reports on basic and clinical research dedicated to novel results and highest quality in any area of thrombosis and haemostasis research, vascular biology and medicine, inflammation and infection, platelet and leukocyte biology, from genetic, molecular & cellular studies, diagnostic, therapeutic & preventative studies to high-level translational and clinical research.

Impact Factor
2013: 5.760

Thrombosis and Haemostasis provides position and guideline papers, state-of-the-art and pro & contra papers, expert analysis and commentaries, and dedicated Theme Issues covering recent developments and key topics in the field. Our mission is to provide a forum for the exchange of ideas and concepts across both the thrombosis & haemostasis, and the vascular biology and medicine communities, fostering cross-disciplinary insights in basic and clinical research.

Through the work of the Editorial Board and the support of numerous referees, the Journal has built a solid reputation assuring a rapid review process (an average of 23 days from submission to first decision), and an opportunity for authors and readers to access the most up-to-date research.

Thrombosis and Haemostasis is the publication platform for excellent manuscripts both in clinical and basic science.

Thrombosis and Haemostasis provides you with standards in haematology, and is a leader at the cutting edge of basic and applied research in vascular biology, as well as being an invaluable resource for both haematologists and cardiologists, as well as clinical pharmacologists, surgeons, gynaecologists, internal specialists and laboratory physicians.

Through the work of the Editorial Board and the support of numerous referees, the Journal has built a solid reputation with an Impact Factor 2013 of 5.760, assuring a rapid review process (an average of 23 days from submission to first decision), and keeping our authors and readers up to date in research and clinical studies.

Thrombosis and Haemostasis is the publication platform for excellent, original manuscripts both in clinical and basic science. With its two Editors-in-Chief, Christian Weber (Basic Science) and Gregory Y. H. Lip (Clinical Studies), the journal has reached a broad scope. Through its productive linkage to various societies, including the European Society of Cardiology (ESC) Working Groups on Thrombosis and Atherosclerosis & Vascular Biology as well as the Società Italiana per lo Studio dell'Emostasi e della Trombosi (SISSET) of Italy, the Spanish society Sociedad Española de Trombosis y Hemostasia (SETH), and the Australian

Vascular Biology Society (AVBS), the journal is also a platform for important Consensus Documents and Position Papers. In addition to in-depth Review Articles, Clinical Focus and T&H Insight articles, our Theme Issues remain a great success with Thrombosis and Haemostasis. Also in 2015, some new exciting theme issues are either in preparation or planned, covering hot topics from both basic science and clinical research.

We very much appreciate your support and look forward to seeing even more submissions of your best work to our journal. On our part, we promise you efficient turnaround and high quality peer review, as well as visible profile in our journal.

Christian Weber
 Editor-in-Chief,
 Basic Science,
 Munich, Germany

Gregory Y. H. Lip
 Editor-in-Chief,
 Clinical Studies,
 Birmingham, UK

Benefits to readers

Early access:

TH First: view accepted articles ahead of print

Easy to submit:

web-based peer review submission via
<http://mc.manuscriptcentral.com/th>

Easy to search online:

by keyword, topic or author

Access to archives:

full text articles dating back to 1998

Receive eTOC (electronic table of contents) by e-mail:

sign up at <http://www.schattauer.de/etoc-EN.html>
